

Annual Medicaid Managed Care Organization Survey Child & Adolescent Health

Demographics

In its seventh year, the 2024 survey findings represent health plan data from almost every state with Medicaid managed care. The annual survey collected information at the parent company/corporate levels and is intended to equip Medicaid stakeholders with the information needed to accurately articulate the national narrative about Medicaid managed care. The survey respondents are representative of the national demographics of all Medicaid health plans.

Barriers Medicaid Health Plans Encounter when Serving Children

86%	Families express lack of transportation to health care location	6	67%	Language barriers	
81%	Identifying and coordinating with schools (e.g., unable to get documentation of care provided at schools)	A.	62%	Engaging family members who are not enrolled in the health plan	M
